The EASY way to run a Handicapping Contest

Thoroughbreds, Harness Racing, Dogs. . . this system works for all.

How it works:

You select a 9 race program at any race track.
Your guests will pick an entry (and an alternate) in each of the 9 races before the first race by marking their selections on the Play Ticket. If their entry finishes in the money they earn points.
You determine the point structure and the prizes to be won

Now for the good part:

You supply the rules and the race program.
SportGame supplies the system and the play tickets.

Guests fill out their play tickets and hand them to your staff. Your staff processes the entry ticket and hands a receipt to the guests. *This takes, at the most, 5 seconds.*

After each race, *within 5 minutes after the official results are posted*, SportGame sends you the guests' total points .

And, if a guest picks the winner in all nine races they can win $10,000. (An insured prize that only costs you $100.)

Notice . . . before the first race, the guest does all the work. Then SportGame takes over and does all the scoring and book-keeping. You relax.

There are many variations to be discussed:

- Hit-The-Boards Elimination contest
- Points for Finish Position contest
- Bonus points for guests "best" race
- Cumulative scoring for a season contest

all programs in which SportGame has years of experience.
